176. Bailey Whitfield "Whit" Diffie was born on↵
177. <strong>June 5, 1944</strong> in Washington, D.C.↵
178. From an early age he showed a remarkable aptitude for↵
179. mathematics and abstract thinking, earning his Bachelor of Science↵
180. in Mathematics from <strong>MIT in 1965</strong>.↵

186. </p>↵
187. ↵
188. </div>↵
189. ↵
190. <p>↵
191. After graduating, Diffie worked at MITRE Corporation and later at↵
192. <strong>Stanford's Artificial Intelligence Laboratory</strong>,↵
193. where he met Martin Hellman and became consumed by a single↵
194. seemingly impossible question: how can two people communicate↵
195. securely without ever meeting to share a key?↵
196. </p>↵
197. ↵
```

```
198. ↵
199. <p>↵
200. Classical cryptography assumed both parties needed a pre-shared↵
201. secret – making secure communication impossibly impractical at scale.↵
202. Diffie refused to accept this, and in <strong>1976</strong> he and↵
203. Hellman published <em>New Directions in Cryptography</em> ↵
204. one of the most important papers in the history of computer science.↵
205. Whitfield Diffie is one of the most important figures in modern cryptography.
    Born on June 5, 1944,↵
206. he became known for his groundbreaking work on public-key cryptography. Together
    with Martin Hellman, ↵
207. Diffie helped develop a new way for people to communicate securely without
    sharing ↵
208. a secret key beforehand. His work has had a major influence on internet security
    and the way we protect ↵
209. private information online today.↵
210. </p>↵
211. ↵
212. ↵
213. <p>↵
214. Today his work underpins↵
215. <strong>every secure connection on the internet</strong>:↵
216. HTTPS, SSH, TLS, Signal, and the entire infrastructure of digital trust.↵
217. Diffie’s contribution continues to shape the digital world today. His ideas form
    the ↵
218. foundation of many secure systems used for online banking, private messaging,
    shopping, ↵
219. and everyday internet communication. His work shows how mathematics and
    innovation can ↵
220. solve real-world problems and leave a lasting impact on technology and
    society.↵
